

2/25, Thursday // 5pm

Cristobal Valenzuela

Co-founder @ Runway AI Inc.

Creative AI with Runway

In this lecture, Cristobal Valenzuela, one of the Runway ML cofounders, will talk about interfaces and metaphors for creative human-computer interaction with machine learning systems.

Cristobal is a Chilean-born technologist and software developer. Along with the Runway team, he has enabled creators to engage machine learning tools in a variety of creative practices. As an intuitive and approachable platform, Runway makes machine learning accessible to students and practitioners regardless of discipline and background.

Previously, Cristobal was a researcher at New York University, focusing on the development of ml5.js. His lecture will address interfaces and metaphors for creative human-computer interaction with machine learning systems.

Representation and Intelligence
Computational Design Lecture Series Spring 2021
